

# PROJECTS & CONSULTING

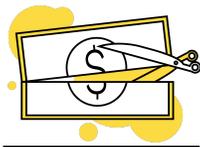

Since 2007, WMS have been providing top-quality asset management solutions and advisory services to local and international blue-chip clients across various industries globally.

Drawing upon skill sets from multiple disciplines, experience levels and areas of expertise, our shared aptitude for Asset Management is gained through a dynamic mix of industry and services. The rich diversity across our consultancy teams and our geographical footprint creates a holistic approach to problem definitions and solutions development.

Our collective intelligence, proven methodologies and functional knowledge enable us to provide asset management solutions resulting in reduced risk, improved asset performance, productivity and increased people capability.

Increased Productivity

Reduced Cost

Improved Efficiency

Increased Lifecycle

Improved Capability

Improved Safety

Increased Uptime

Reduced Risk

WMS leverage our existing knowledge and acquire valuable organisational learnings from facing multiple challenges within the Asset Management field. WMS has the experience and capability to meet multiple stakeholder requirements and expectations.

Clearly understanding the client's needs and challenges, creating workable solutions in partnership, and providing a clear pathway to successful outcomes, is key to establishing lasting relationships

Manager - Asset Management East

## STRATEGIC CONSULTING

Based on asset life cycle requirements, WMS delivers strategic business improvements. Incorporating Asset Management policy development, organisational effectiveness, productivity improvement and Maintenance Strategy Development.

## FUNCTIONAL CONSULTING

Structured implementation of best in class Asset Management solutions aligned with our clients specific requirements and ISO55001 Standards. Including facilitation and development of asset management frameworks across planning, reliability, system/process assessments, data analysis, strategy reviews and business case development based on life cycle cost modelling.

## ASSET MANAGEMENT PROJECTS

Working in partnership with our clients, we utilise the WMS project management framework and governance structure to deliver an improvement to asset management systems/process performance and people capability.

## ASSET MANAGEMENT PROCESS OPTIMISATION

Dedicated to the optimisation of client's Asset Management processes, including but not limited to Work Management, Shutdown Management, Defect Elimination, Operate for Reliability, Asset Tactic Development, Hydrocarbon Management and Condition Monitoring. This ensures reduced risk, optimised cost management, value generation, workforce efficiency, maximised planned activities and reducing reactive decision making.

## COACHING AND MENTORING

WMS engage with our clients at all levels of an organisation to deliver tailor-made solutions, supporting and developing internal Asset Management capability and leadership.
